1. Allergy/Immunology							
+ § !	1799/ 444	NA	Registry	Process	Efficiency and Cost Reduction	Medication Management for People with Asthma (MMA): The percentage of patients 5-64 years of age during the measurement year who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.	National Committee for Quality Assurance

Note: With the exception of measures #160 and #444, the AAAAI Qualified Clinical Data Registry (QCDR) offers all the measures including in the MIPS Allergy/Immunology Specialty Measure Set above. Also, the AAAAI QCDR offers asthma and allergy immunotherapy measures **ONLY** available for reporting in the registry.

The benefit of reporting via QCDR, in addition to meeting the Quality category criteria, is that you can also attest to both the 2017 Improvement Activities and Advancing Care Information performance categories. Learn more about the AAAAI QCDR reporting options, registration fees, and measures specification at www.aaaai.org/qcdr
