

Haven't received your COVID-19 vaccine yet? Here are reasons why it's the right choice:

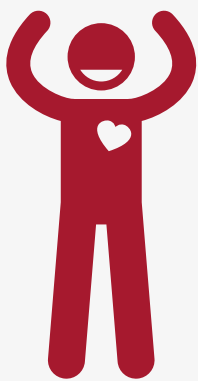

Getting a COVID-19 vaccine greatly reduces your chance of severe illness, hospitalization, and death from COVID-19 and its variants.

Getting vaccinated protects the people around you and your community.

COVID-19 vaccines have been rigorously tested and more than 150 million people in the United States have been fully vaccinated.

If you've had COVID-19, the vaccines will give you even better protection from reinfection.

COVID-19 vaccines at the population level will help prevent the appearance of newer COVID-19 strains.

Save lives. Get vaccinated.
